Average Winter Water Average for Commercial/Industrial/Institutional Accounts:

Calculation of the Average Winter Water Usage (AWWU) will be 125% of the average consumption of what is billed on the customer's December, January, February, March, and April sewer bill. Customer must have consumption history with the City of Reedley for the aforementioned months. If a history is not available, then the customer will be billed per their actual consumption until the next AWWU calculation period. If a customer has 0 or 1,000 gallons of usage in a given month during the AWWU calculation period, those readings will not be included into the AWWU calculation. AWWU calculations will be rounded down to the nearest 1,000 gallons.

The billing for May, June, July, August, September, October, and November will be the lesser of either the calculated AWWU number or the actual consumption. Bills processed on December 1, January 1, February 1, March 1, and April 1, are based on actual consumption amounts during those billing periods, and not per an AWWU calculation. For All Commercial, Industrial, and Institutional accounts: If a separate "irrigation only" meter exists, then the AWWU calculation would only apply to the domestic meter.
